PROFESSIONAL SUMMARY

CSE student with strong foundations in Data Structures & Algorithms, OOP, DBMS, and Operating Systems, backed by 250+ LeetCode problems solved. Experienced in developing AI-driven applications and full-stack solutions using Python, Java, and modern web technologies. Demonstrates strong analytical and problem-solving abilities, with a focus on writing efficient, maintainable code and building reliable software solutions.

EDUCATION

Chitkara University, Punjab **2024 – 2028**
B.E.Computer Science & Engineering **| CGPA: 8.29/10**

PROJECTS

ARGUS AI — Near-Earth Object Intelligence Platform | Python, Random Forest, NASA APIs, Data Analysis **Aug 2026**

- Built an AI-powered asteroid risk assessment platform using historical NEO data and NASA APIs to analyze orbital and physical characteristics of Near-earth objects.
- Developed a Random Forest classification model using features including estimated diameter, relative velocity, miss distance, absolute magnitude and NASA hazardous-object classification to predict asteroid threat levels.

VOYAGE — Smart Visa Consultation Platform | Node.js, Express.js, PostgreSQL, Prisma ORM **May 2026**

- Developed a full-stack visa consultation platform providing country-specific visa guidance, eligibility criteria, document requirements, and application workflows.
- Built backend APIs using Node.js and Express.js, integrating PostgreSQL through Prisma ORM to manage visa information and structured application data.

Automatic Number Plate Detection & Recognition System | Python, Raspberry Pi Zero 2 W, OCR **Dec 2025**

- Developed a number plate detection system using Raspberry Pi Zero 2 W and a camera module to capture vehicle images and identify license plates for automated vehicle monitoring and parking applications.
- Implemented an OCR-based recognition workflow to extract vehicle registration numbers from captured images, converting visual data into machine-readable text for vehicle tracking, parking management, and registration record maintenance.

Experience

ACM Society — Event Promotions & Outreach | *Chitkara University* **2024 – Present**

- Managed event promotions and outreach through social media and student networks to increase student participation.
- Created and distributed promotional content to improve event visibility and engagement.

NSS — Contributor | *Chitkara University* **2024 – Present**

- Contributed to community service initiatives, supporting social awareness and outreach activities.
- Assisted in organizing and coordinating volunteer activities, demonstrating teamwork, responsibility, and collaboration.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript
Core CS: DSA, OOP, DBMS, OS, Computer Networks
Frameworks & Technologies: React.js, Next.js, Node.js, Express.js, REST APIs
Databases: MySQL, PostgreSQL, MongoDB
Machine Learning: Random Forest, Data Analysis
Developer Tools: Linux, Git, GitHub

ACHIEVEMENTS

Hackathons: Participated in 5+ hackathons.
DICE TechInnovate 3.0: Secured 5th position.
Build with AI (Google): Qualified among the Top 40 teams out of 750+ teams.
